## 3 NIGHTS 4DAYS SAVUTI CHOBE NATIONAL PARK

Pre Arrival; Our staff will meet you at Maun International Airport and we will welcome you with a friendly African smile and invite you to a refreshing stay in the untamed bush. Surrounded by the noises of an ever active bush and unexpected sightings of the free-roaming wildlife, a safari in Savuti , lenyanti and Chobe National Park for 3 nights 4 days

### DAY 1 SAVUTI

We will depart from Maun to Savuti in the afternoon after lunch so that we have time to see the beauty of Savuti since we will spend a night in the wilderness. The Savuti area borders the Delta to the west and Chobe National Park to the east and is one of Africa's best known big game areas. Savuti is a place of enchantment, of beauty, and boasts one of the greatest concentrations of animals in Southern Africa. It runs a distance of 100 kilometers from the Chobe River, through a gap in the sand ridge, to the Mababe Depression. Falling only approximately 18 meters, this channel brings water from the Chobe to Mababe,

creating a small marsh where it enters the depression. Its resident lion and spotted hyena populations. We will reach Savuti campsite in the evening, and camp assistant will set up the camp while you have time to catch up with others, dinners will be served and spend a night in the wild.

### DAY 2 LENYANTI

We will depart from Savuti to Linyati to spend night on canvans tent after a simple breakfast for game viewing. Pre packed lunch will be brought along. Linyanti is situated in the north of Savuti in a corner of the Chobe National Park. The Linyanti Swamp is one of the most attractive areas in the park. It boasts a great diversity of game and a restful atmosphere. The Linyanti River follows a line representing the extreme south western extension of East Africa's Great Rift Valley. The Linyanti River is in a way similar to the Okavango Delta with its papyrus-lined waterways, extensive reed banks and towering riverine forest.

Maun Botswana

The river forms a swamp area, reminiscent of the one found in the Okavango, although it is not more than 900 square kilometers in extent, as opposed to the much larger Okavango Delta. Wildlife viewing in the Linyanti region is excellent. It boasts large concentrations of elephant, lion, sable, roan, hippos, and wild dog, building to a peak in the dry winter months. The area also offers spectacular birding year round and is best known for its enormous herds of Elephant which move down to the Linyanti River at the start of the winter months and only move back inland once the main rains arrive. Sable and Roan Antelope occur, as well as Lion, Leopard and Wild Dog. Therefore we will have time for game viewing in the morning before departing to Chobe National Park.

under canvas. The park is bordered by the Chobe River on its northern boundary, which enables active ecosystems and a large variety of wildlife. The 11 700km<sup>2</sup> park is made up of 4 areas: the Chobe Riverfront, the Ngwezumba pans, Savute and Linyanti. The guides are well trained and able to track the animals for the best game viewing. A game drive in Chobe National Park typically affords visitors sightings of Elephant, Hippo, Buffalo, Zebra, Lion, Hyena and a variety of antelope. Leopard, Cheetah, Bat-eared Fox and the swamp-dwelling Sitatunga have also been spotted on game drives. Therefore game drives will be conducted in the morning for 3 hours after that we depart from Chobe National Park the trip will end.

### TRIP ENDS

### Chobe National Park

We will depart from Linyanti to Chobe National Park after a simple breakfast where we will spend a night under a melodies night
